

FIBER CONNECTIVITY AT SENTIERRE RESORT HOTEL & RESIDENCES, PADRE CANYON
Dedicated Fiber Optics is being installed for all Residential Villas by TDS

(Ivins, Utah) – For Immediate Release – Sentierre Hotels & Sanctuaries announced that the brand’s inaugural luxury resort hotel, Sentierre Resort Hotel & Residences, Padre Canyon will be a TDS Telecom® fiber neighborhood, providing dedicated high-speed fiber connectivity to residents and guests.

Sentierre Padre Canyon’s 43 Villa residences, currently under construction, are being outfitted with TDS’ dedicated fiber optic service, installed in-ground to each home as part of the standard infrastructure. Offering a variety of high speed internet options, TDS fiber optics optimizes the processes of uploading, downloading, video quality and phone clarity.

“Providing the most efficient and effective connectivity for our residents and guests is part of the Sentierre philosophy of optimizing personal well-being with uncompromising comfort and extraordinary unpretentious service,” stated Jessica Mousley, Sentierre vice president of operations. “Seamless connectivity is a central feature in this unique resort community of homes. It is absolutely integral in the design of our 4- and 5-bedroom luxury Villa residences, fully as important to the lifestyle experience as the open concept living-dining-kitchen areas, floor to ceiling windows, focused natural light, and generous exterior patio and deck space with private pool. It’s how we live today”.

Sentierre’s Discovery Center is open at Ancestor Square in St. George, Utah where additional information about the resort hotel, residences, TDS fiber optic connectivity, and distinct owner privileges may be explored.
